Ultra Balance Releases Reformulated Dog Food

October 1, 2013

PERRIS, Calif. — Star Milling Company has reformulated its Ultra Balance Adult dog food to be healthier than ever for your dog.

Ultra Balance is formulated with multiple protein sources to give your dog a good balance of amino acids. It includes fish, which provides the all-important omega fatty acids that boost metabolism. Spirulina adds protein and essential amino acids. And beet pulp, an excellent source of soluble fiber, was included to improve your pet's digestion.

The reformulated product contains brewer's yeast, a good source of vitamin B, as well as kelp, which provides antioxidants for overall cell-health. Ultra Balance also contains flax, which includes omega 6 and improves your pets' skin and coat, and Alltech® products, with yeast culture ingredients that promote good digestion.

Ultra Balance is also notable for what it doesn't have—the reformulated blend contains no corn or wheat because those high starch grains can cause your pet to experience allergies and itchy skin. And, as is always the case with Star Milling products, you get excellent quality at the best price possible. Ultimately, Ultra Balance offers the good gut integrity and excellent value that Star Milling products are known for.

Ultra Balance is an all-stage brand offering great nutrition and digestibility. [Click here](#) to locate a dealer near you. For more products or tips on dogs' diets, [click here](#).

About Star Milling Company

Star Milling Company manufactures nutritious, high-quality animal feed that is sold through feed stores in the western United States. Products are sold under the brand names Ace Hi, Integrity, Kelley's, Star Brand, Ultimate Show Feed, and Ultra Balance.

A family-owned and operated company for three generations, Star Milling has a personal commitment to quality and good manufacturing practices.

While large enough to manufacture a wide range of feeds for many species, we have a small company concern for our customers and their animals.
