All Purpose Lay

Mash/Crumble/Pellets

Maximum egg production

Important Tips On Raising Poultry

Here are some important tips for managing your birds, whether they are on a farm or in your backyard. For more detailed information, view the Kelley's Poultry Care Guide in the Brochures section of www.starmilling.com.

Importance of Water: They must have water with their feed to be able to digest properly. A chicken is more than 20% water and a large chicken will drink 1 to 2 cups a day, depending on the weather. Chickens drink water in small increments, so they must drink frequently throughout the day. Eggs are 65% water, and if a hen is unable to get enough water she will not lay properly. If she is deprived of water, even for only a short time, her laying ability may be seriously impaired.

Health tips: The best way to prevent outbreaks of diseases and parasites is to exercise preventative healthy practices.

- 1) Do not house new chickens in facilities previously used by another flock until the facilities have been thoroughly cleaned and disinfected.
- 2) Never mix chicks or growing birds with adults.
- 3) If you must mix birds of another flock with your existing flock, quarantine the new birds for weeks to make sure they are disease free.
- 4) Avoid exposing your flock to wild birds and vermin.
- 5) Observe proper nutrition.
- 6) Provide spacious coops with adequate ventilation.
- 7) Isolate sick birds from the rest of your flock.
- 8) Vaccinate against disease common to your area.
- 9) Guard against parasites.
- 10) Work with your veterinarian.
- 11) Do not indiscriminately administer antibiotics as a preventative health care practice.

PRODUCT SPECIFICATIONS

Chick Starter

Mash

For baby chicks up to 6 weeks of age.

Primary Ingredients:

Ground Corn, Soybean Meal, Wheat Bran, Calcium Carbonate, Mono-Dicalcium Phosphate, Canola Oil, Grit, Salt, Vitamins and Trace Minerals

Quick Gain

Crumble

For broiler chicks up to 8 weeks of age.

Primary Ingredients:

Ground Corn, Soybean Meal, Wheat Bran, Wheat Flour, Dried Whey, Poultry Fat, Alfalfa Meal, Calcium Carbonate, Mono-Dicalcium Phosphate, Fish Meal, Canola Oil, Salt, Vitamins and Trace Minerals

Starter - Grow

Crumble

For chicks from 0 to 18 weeks old.

Primary Ingredients:

Corn, Soybean Meal, Calcium Carbonate, Mono-Dicalcium Phosphate, Molasses, Canola Oil, Salt, Vitamins and Trace Minerals

18% Grow

Mash

For young chicks from 6 weeks of age to 18 weeks.

Primary Ingredients:

Cracked Corn, Soybean Meal, Wheat Bran, Calcium Carbonate, Mono-Dicalcium Phosphate, Molasses, Grit, Salt, Vitamins and Trace Minerals

All Purpose Lay

Mash/Crumble/Pellets

For laying hens 18 weeks of age and older.

Primary Ingredients:

Corn, Soybean Meal, Wheat Bran, Calcium Carbonate, Molasses, Alfalfa Meal, Grit, Oyster Shell (mash only), Mono-Dicalcium Phosphate, Canola Oil, Salt, Vitamins and Trace Minerals
