

TROUT & BASS FEED

Proper nutrition and properly sized foods are essential for the health and growth of trout and bass. The Aquaxcel Starters and Star Milling's Grow feeds are complete balanced diets, specifically matching the size and optimal nutritional requirements of each of growth phase.

TROUT

- Great for cool temperatures 55°F 68°F (10°C -20°C), varies with stage of growth
- · Ideal water pH level is 6.5 to 7.0.
- · Very fast growth rate
- Excellent food conversion ratios

5014 Starter

Meal 0.3 / 0.4 mm 72990255 & 72990204

Hatchery Phase

Fry measuring: <1 in.

Feed every 2 hours an amount fish will readily consume within 5 min.

5014 Starter

0.6 mm

72890255 & 72890205

Hatchery Phase

Fry measuring: 1 - 1.5 in.

Feed every 2 hours an amount fish will readily consume within 5 min.

BASS

- Bass are great for Aquaponics systems with warmer water temperatures
- Preferred water temperatures for optimum growth 79°F 82°F (26°C 28°C)
- Ideal water pH level is 6.5 to 8.5.
- Bass require excellent water quality; do not tolerate overcrowding

5014 Starter

0.8 mm

72790255 & 72790205

Hatchery Phase

Fry measuring: 1.5 - 2 in.

Feed every 3 hours an amount fish will readily consume within 5 min.

5014 Starter

1.5 mm

72690255 & 72690205

Fingerling Phase

Fry measuring: 2 - 3 in.

Feed every 4 hours an amount fish will readily consume within 10 min.

2.2 mm 73190250 & 73190205

within 10 min.

Fingerling Phase Fingerling measuring: 3 - 5 in. Feed 4 to 5 times per day an amount fish will readily consume

5/32 in

72981450

Grow Out Phase

Fish measuring: 6 - 8 in.

Feed 2 to 3 times per day an amount fish will readily consume within 15 min.

4 mm

72980450 & 72980405

Grow Out Phase

Fish measuring: > 8 in.

Feed 2 to 3 times per day an amount fish will readily consume

within 15 min.

* Fish size and feeding rates are approximate values only.
